

TRIBUNAL CIRCULAR

23 May 2014

WI-FI IN TRIBUNAL HEARING ROOMS

Wi-Fi access to the internet is now available in the Tribunal's hearing rooms at Hobart.

Availability

Access to the public internet network will be available on request to all lawyers and other regular professional visitors for defined periods (valid for up to 30 days maximum). Access requires a password.

Connection

The connection should be automatically detected by your device.

Private Sector Lawyers' login – the connection to the service for private lawyers and counsel is **TasGov_Guests**.

Department of Justice Lawyers' login – DOJ users, including Crown Law and Court officers, will be able to obtain access to the Justice network to access files and online resources. The connection is **TasGov_DOJ**. Each user in this category must be registered with Justice IT Services in advance in order to access this service.

Other Tasmanian government employees – Government employees outside DOJ may log on to either **TasGov** or **TasGov_Internet**. The **TasGov** connection will give access to the user's department's intranet and other internal resources. The **TasGov_Internet** connection is internet access only for Tasmanian government employees. For both these connections, the user must be approved and access must be arranged in advance by the user's own Department.

Password

Requests for password access should be directed to the staff at the Registry counter. The password for **TasGov_Guest** users will expire every 30 days.

Technical Support

Tribunal staff cannot give technical assistance in relation to the Wi-Fi service. Please contact your own IT staff or service provider for technical assistance.
